Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Odisha**, drain out excess rain water immediately in rice, maize, millets, groundnut, ginger, turmeric, vegetables, pulses and orchards and keep drainage channels clear. Do not allow water to stagnate in ginger beds and provide mechanical support or staking to vulnerable crops to minimise lodging. Continue intercultural operations only after rainfall stops and the soil becomes workable.
- In **Gujarat**, provide continuous and effective drainage to remove excess water from sugarcane, cotton, rice, pigeon pea, castor, sorghum, maize and groundnut. Prevent lodging of sugarcane by tying tall canes with dry leaves or bamboo sticks.
- In **Telangana**, provide adequate drainage in fields to drain excess water in standing crops.
- In **West Madhya Pradesh**, ensure proper drainage in soybean, cotton, maize and sugarcane fields to prevent waterlogging. Provide support to vulnerable plants and undertake propping in tall sugarcane to minimize lodging. Postpone irrigation, fertilizer application and plant-protection operations in saturated soil.
- In **Konkan**, make arrangement to drain out excess water from finger millet, turmeric, groundnut, sugarcane, vegetables and orchards.

- In **Madhya Maharashtra**, harvest matured black gram and green gram and keep the harvested produce at safer places. Make arrangement to drain out excess water from finger millet, groundnut, vegetables and orchards.
- In **Marathwada**, harvest matured maize, green gram and black gram. Keep the harvested produce at safer places. Make arrangement to drain out excess water from *kharif* crops, orchard, vegetables and floricultural crops.
- In **Vidarbha**, undertake harvesting matured green gram and black gram as early as possible and keep the harvested produce at safer places. Ensure proper drainage to drain out excess water from *kharif* crops like rice, soybean, cotton, pigeon pea, maize etc. vegetable and orchards. Provide mechanical support to newly planted orchards and vegetables to prevent them from lodging.
- In **Assam**, postpone sowing of maize, black gram, green gram & sesame. Drain out excess water from already sown maize, black gram, green gram & sesame. Maintain water level in rice. Shift the harvested produce of red gram to safe places. Provide support to papaya, banana vegetables and to week stemmed crops.
- In **Meghalaya**, ensure proper drainage in rice, maize, sugarcane, soybean, pigeon pea, jute, sesame and vegetable fields and keep drainage channels clear. Provide staking/support for tall and fragile crops like banana, papaya, cucumber, bottle gourd, pumpkin, etc. to prevent lodging.
- In **Arunachal Pradesh**, maintain proper drainage in rice, maize, finger millet, soybean, cowpea, vegetables and orchards and remove excess water promptly. Provide support to vulnerable standing crops wherever required to minimise lodging.
- In **Nagaland, Manipur, Mizoram and Tripura**, maintain proper drainage in rice, soybean, black gram, ginger, turmeric, cole crops and vegetable fields to prevent water stagnation. Harvest mature maize, colocasia and ginger wherever field conditions permit and keep harvested produce in safe and dry places.
- In **Chhattisgarh**, drain out excess rainwater from rice, maize, groundnut, minor millets, pulses and vegetable fields to prevent prolonged waterlogging. Keep drainage channels clear, particularly in low-lying maize, ginger and turmeric fields, and remove excess water promptly.
- In **Sub-Himalayan West Bengal and Sikkim**, maintain proper drainage in rice, vegetable fields and orchards to prevent water stagnation. Keep drainage channels clear and protect standing vegetables and horticultural crops from excess rain wherever required.
- In **Coastal Andhra Pradesh**, ensure effective drainage to drain excess rain water from rice, groundnut, maize, kodo millets, turmeric, coffee plantation, orchards and vegetables.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
