Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Keralam**, ensure effective drainage from paddy, banana, coconut, pepper, ginger, turmeric, vegetables and other standing crops, with priority to low-lying and waterlogged fields. Provide strong support to banana and other vulnerable crops, strengthen drainage around plantations and postpone irrigation, fertilizer application and plant-protection operations until field conditions improve.
- In **Tamil Nadu**, drain excess water from rice, sorghum, maize, black gram and vegetable fields. Undertake detashing and propping of sugarcane and provide adequate support to banana, papaya and moringa to prevent lodging. Harvest mature paddy wherever conditions permit and keep harvested grains in dry storage.
- In **Coastal Karnataka**, maintain effective drainage in standing crop fields to prevent waterlogging and keep drainage channels clear. Provide mechanical support to banana and papaya plantations and staking to young plants and vegetables; undertake propping in sugarcane to minimise lodging.
- In **South Interior Karnataka**, maintain proper drainage in standing crop fields and remove excess rainwater promptly from low-lying areas. Postpone irrigation, intercultural operations, fertilizer and plant-protection applications while fields remain wet, and provide staking/propping support to vulnerable crops.
- In **Arunachal Pradesh**, drain excess water from rice, maize, soybean, finger millet and vegetable fields and remove mud and debris from standing crops. Harvest mature maize, cucumbers, bottle gourds and other vegetables during suitable dry intervals, and secure vegetable vines to stakes or trellises to prevent lodging.
- In **Assam and Meghalaya**, ensure proper drainage in rice, maize, soybean, pigeon pea and vegetable fields and keep drainage channels free from obstruction. Continue rice nursery operations only where field conditions permit, harvest mature jute and vegetables during suitable dry intervals, and support banana, papaya and other vulnerable plants against lodging.
- In **Nagaland, Manipur, Mizoram and Tripura**, maintain adequate drainage in standing crop fields to prevent waterlogging and postpone irrigation, intercultural operations, fertilizer and plant-protection applications while fields remain wet. Harvest mature crops during suitable dry intervals and provide support to vulnerable vegetables and other standing crops.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Agromet advisory for likely impact of heavy rainfall on Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
