Impace and Actions

Impact Expected and Action Suggested due to heavy rainfall:

- **Isolated heavy rainfall** likely over Tamil Nadu, Puducherry & Karaikal during 6th-10th November; Keralam & Mahe during 6th-8th November; Coastal Andhra Pradesh & Yanam on 6th November.
- **Isolated heavy rainfall** likely over Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad on 12th November.
- **Isolated heavy rainfall** likely over Andaman & Nicobar Islands during 9th-11th November.
- **Isolated heavy rainfall** likely over Arunachal Pradesh and Assam & Meghalaya during 10th-11th November; Nagaland, Manipur, Mizoram & Tripura during 9th-11th November.

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Tamil Nadu**, provide adequate drainage and drain excess water from rice, maize and casuarina and provide mechanical support to banana plantations. Open field drains immediately to prevent root zone waterlogging in sugarcane.
- In **Keralam**, ensure proper drainage in standing crop fields. Undertake transplanting of *rabi* rice only when field conditions are suitable. Prepare well-drained planting pits for banana. Provide support to banana and papaya plantations and stake young plants and vegetables wherever required to minimise damage from gusty winds.
- In **Coastal Andhra Pradesh**, maintain proper drainage from fields of rice, cotton, red gram, maize, sugarcane, groundnut, sorghum, pearl millet, turmeric, ginger and vegetables and plantations of banana, papaya and coffee to prevent waterlogging. Lift lodged plants of rice and sugarcane wherever feasible and provide support to prevent further damage. Provide mechanical support to banana and papaya plantations and stake young plants and vegetables.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.

- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
