Impact and Actions

Impact Expected and Action Suggested due to heavy rainfall:

- Isolated heavy rainfall likely over Arunachal Pradesh during 3rd-4th October; Assam & Meghalaya on 30th September; Nagaland, Manipur, Mizoram & Tripura, Coastal Karnataka, South Interior Karnataka and Tamil Nadu, Puducherry & Karaikal during 30th September-1st October; Kerala & Mahe during 1st-2nd October and on 4th October.

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.
- Helicopter services to be regulated.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Tamil Nadu**, protect mature pineapple and other horticultural produce from rain damage and harvest during dry intervals. Keep vegetable fields well drained, avoid field operations when soil is excessively wet, and protect nursery beds and newly planted crops from waterlogging.
- In **Coastal Karnataka** and **South Interior Karnataka**, maintain drainage in standing crop fields and postpone irrigation, intercultural operations, fertilizer and plant protection. Harvest mature green gram, black gram and soybean during dry intervals and shift harvested produce to safe, covered storage.
- In **Uttarakhand**, maintain proper drainage in rice, maize, finger millet, sugarcane, pigeon pea, green gram, black gram, soybean, vegetables and keep drainage channels clear. Avoid irrigation during rainfall is adequate and provide support to tall crops and vegetables to prevent lodging.
- In **East Rajasthan**, harvest the matured pearl millet, early-sown green gram, pods of moth bean & cowpea during dry intervals and store the harvested produce in a safe and dry place. Maintain drainage in standing crop fields and provide support to tall crops and vegetables.
- In **Assam** and **Meghalaya**, drain excess water from *Sali* rice, maize, ginger and vegetable fields and keep drainage channels clear. Harvest mature jute, banana and bottle gourd during dry intervals and shift produce to safe, dry places. Maintain field bunds and protect vegetable nurseries from excess rain.
- In **Nagaland, Manipur, Mizoram** and **Tripura**, ensure adequate drainage in standing crop fields and postpone irrigation, intercultural operations, fertilizer and plant protection applications while fields remain wet. Harvest

mature Jhum rice, maize, soybean, groundnut and black gram during suitable dry intervals and shift the produce to safe storage.

- In **Keralam**, make necessary arrangements for drainage in banana, coconut, paddy, spice and vegetable fields and prevent water stagnation in field. Postpone irrigation and field operations during rainfall.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
