Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Tamil Nadu**, drain out excess water from paddy, banana, cotton, turmeric, sugarcane and tapioca fields to prevent waterlogging. Keep the harvested produce of paddy and groundnut in safe places. Postpone fertilizer application, pesticide spraying and intercultural operations during rainfall.
- In **Keralam**, drain excess water from paddy, coconut, vegetables, ginger, banana field. Provide mechanical support to banana and papaya plants and stake young plants to avoidlodging. Postpone fertilizer application and plant-protection operations during rainfall.
- In **Coastal Karnataka**, ensure proper drainage in ginger and other standing crop fields. Provide support to vulnerable horticultural plants and protect harvested produce in covered, dry storage.
- In **South Interior Karnataka**, harvest mature maize, black gram, green gram, and soybean wherever conditions permit and shift the produce to safe place. Ensure proper drainage in standing crop fields. Provide staking or propping to crops vulnerable to lodging, particularly horticultural crops.
- In **Andman and Nicobar Islands**, harvest mature rice and keep the harvested produce in covered shaded, well ventilated and dry place. Make necessary arrangements to drain out excess rain water from rice, black papper plantation and clean drainage channels to prevent water stagnation around the base of coconut palms.
- In **Andhra Pradesh**, harvest mature groundnut, maize, rice, finger millet and other standing crops during suitable dry intervals and store the produce safely. Make necessary arrangement for drainage in standing

crops, particularly rice, maize, finger millet, groundnut and vegetables.
- In **Odisha**, complete the harvesting of mature crops and store the produce in a safe, dry place. ?Clean field drainage channels to prevent waterlogging, particularly in low-lying fields and vegetable plots.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

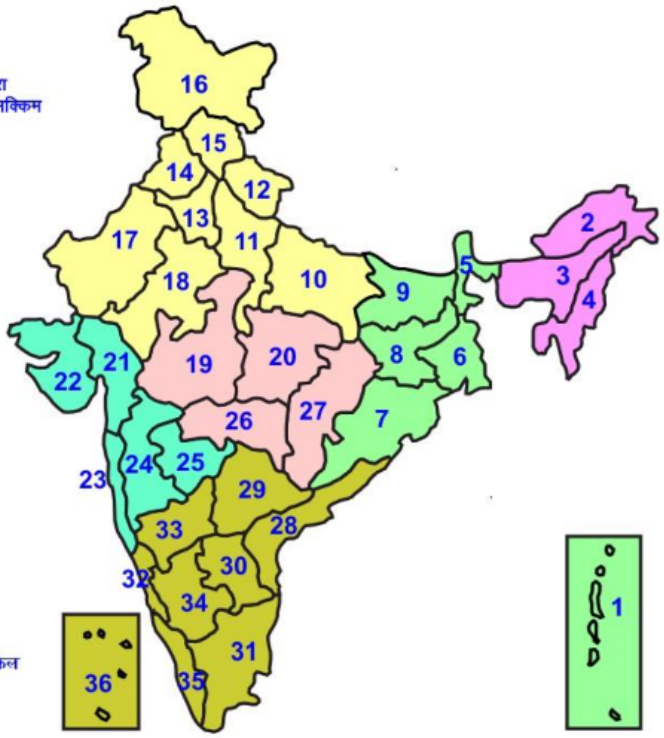

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
