- In **Uttar Pradesh**, ensure effective and continuous drainage of excess rainwater in black gram, green gram, pigeon pea, okra, sesame and other standing crop fields, particularly low-lying areas prone to waterlogging. Continue transplanting brinjal, tomato, chilli and early cauliflower only where field conditions permit. Postpone irrigation, fertilizer application and plant-protection operations in saturated soil.
- In **Sub-Himalayan West Bengal** and **Sikkim**, keep drainage channels clear in rice, vegetable fields, orchards and nursery beds to prevent waterlogging. Protect vegetable seedlings from heavy rain, improve drainage around cucurbits.
- In **Uttarakhand**, maintain effective drainage in sugarcane, soybean, kidney bean, green gram, black gram, other standing crops and vegetable fields. Keep drainage channels clear and provide support to tall crops and vegetables to prevent lodging.
- In **Bihar**, maintain proper drainage in rice, maize, sesame, pigeon pea and other standing crop fields and avoid prolonged water stagnation. Postpone field operations, fertilizer and plant-protection applications in excessively wet fields until suitable conditions prevail.
- In **Madhya Pradesh**, ensure proper drainage in soybean, cotton, maize and sugarcane fields to prevent waterlogging. Avoid transplanting during wet conditions, provide support to vulnerable plants and undertake propping in tall sugarcane to minimise lodging. Postpone irrigation, fertilizer application and plant-protection operations in saturated soil.
- In **Assam** and **Meghalaya**, ensure effective drainage in rice, sugarcane, soybean, pigeon pea, jute, sesame

and vegetable fields and keep drainage channels clear. Harvest jute at the small-pod stage wherever field conditions permit.

- In **Nagaland, Manipur, Mizoram** and **Tripura**, maintain proper drainage in rice, soybean, black gram, ginger, turmeric, cole crops and vegetable fields to prevent water stagnation. Harvest mature maize, colocasia and ginger wherever field conditions permit and avoid field operations during excessively wet conditions. Keep harvested produce in safe and dry places.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
