Impace and Actions

Impact Expected and Action Suggested due to very heavy / heavy rainfall:

- Isolated **extremely heavy rainfall** likely over Coastal Andhra Pradesh & Yanam and Odisha during 27th-28th October; Telangana on 28th; Chhattisgarh during 28th-29th October.
- Isolated **very heavy rainfall** also likely over Tamil Nadu, Puducherry & Karaikal on 26th; Jharkhand, East Madhya Pradesh and Odisha on 29th October; Bihar and East Uttar Pradesh during 29th-30th; Vidarbha on 28th October.

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.
- Helicopter services to be regulated.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy/ Very Heavy/ Extremely Heavy Rainfall

- In **Tamil Nadu**, drain out excess water from paddy, banana, cotton, turmeric, sugarcane and tapioca fields to prevent waterlogging. Keep the harvested produce of paddy and groundnut in safe places. Postpone fertilizer application, pesticide spraying and intercultural operations during rainfall.
- In **Keralam**, drain excess water from paddy, coconut, vegetables, ginger, banana field. Provide mechanical support to banana and papaya plants and stake young plants to avoidlodging. Postpone fertilizer application and plant-protection operations during rainfall.
- In **Andman and Nicobar Islands**, harvest mature rice and keep the harvested produce in covered shaded, well ventilated and dry place. Make necessary arrangements to drain out excess rain water from rice, black papper plantation and clean drainage channels to prevent water stagnation around the base of coconut palms.
- In **Chhatisgarh**, harvest the mature rice, maize and groundnut, keep the harvested produce including earlier harvested produce like black gram and green gram in covered, shaded and well ventilated dry place. Postpone sowing of tomato and provide mechanical support to brinjal and okra plants. Postpone drying of minor millets. Postpone fresh sowing/transplantation of winter vegetables.
- In **Coastal Andhra Pradesh**, harvest mature groundnut, maize, rice, finger millet and other standing crops during suitable dry intervals and store the produce safely. Make necessary arrangement for drainage in standing crops, particularly rice, maize, finger millet, groundnut and vegetables.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

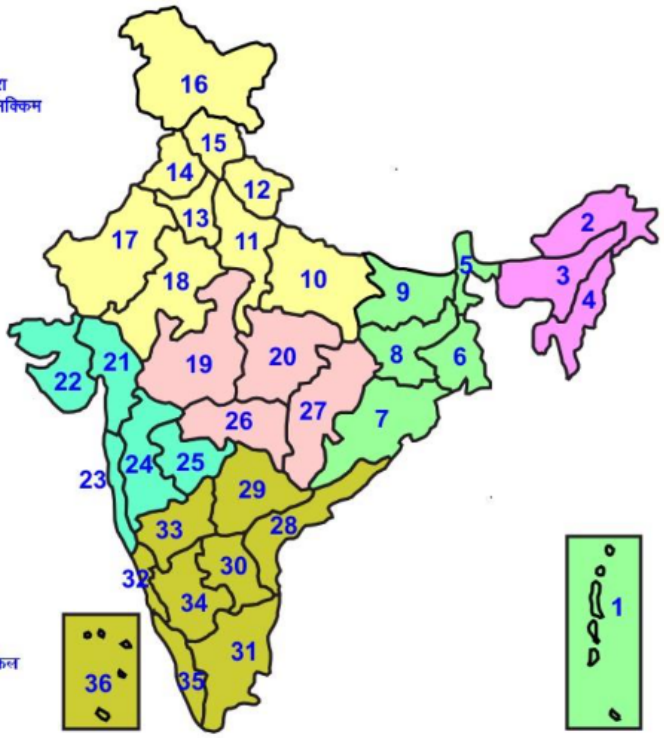

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
