Meteorological Analysis (Based on 1430 hours IST)

- Due to decrease in the rainfall activity, cloudiness and Relative Humidity during past 2 days absence of south-west monsoon and prevalence of dry northerly winds over the region in accordance with the **anticyclonic circulation** over north Gujarat region and adjoining south-west Rajasthan at lower atmospheric levels, south-west monsoon has withdrawn from remaining parts of north India, entire Gujarat & Madhya Pradesh and some parts of Bihar, Jharkhand, Chhattisgarh and Maharashtra.
- The **line of withdrawal of Southwest Monsoon** continues to pass through 27.5°N/86.5°E, Supaul, Ranchi, Raipur, Brahmapuri, Parbhani, Baramati, Harnai and 17.5°N/71.8°E.
- **Conditions are likely to become favourable** for further withdrawal of southwest monsoon from most parts of Marathwada & Vidarbha, some more parts of Maharashtra & Chhattisgarh and some parts of Telangana & North interior Karnataka during next 2-3 days.
- The **upper air cyclonic circulation** over northeast Assam & neighbourhood extending upto 1.5 km above mean sea level and a north-south trough aloft at 3.1 km above mean sea level runs roughly along 92.5° E/24.8° N persists.
- The **upper air cyclonic circulation** over Westcentral Arabian Sea between 3.1 & 7.6 km above mean sea level persists.
- The **upper air cyclonic circulation** over East Uttar Pradesh & adjoining Bihar at 3.1 km above mean sea level persists.
- The **upper air cyclonic circulation** over Southeast Arabian sea & adjoining Lakshadweep area at 0.9 km above mean sea level persists.
- The **Upper air cyclonic circulation** over Comorin and adjoining area at 3.1 km above mean sea level persists.
- The **Upper air cyclonic circulation** over south coastal Andhra Pradesh and neighbourhood between 5.8 Km & 7.6 km above mean sea level persists.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In Arunachal Pradesh, maintain proper drainage in rice, finger millet, soybean and vegetable fields to remove excess water and prevent waterlogging. Harvest mature upland/Jhum rice, finger millet, soybean and vegetables during suitable dry intervals and move the produce to safe, covered storage. Continue harvesting mature tomato and chilli and protect vegetable vines with adequate staking/support.
- In Assam and Meghalaya, maintain effective drainage in rice, maize, soybean, pigeon pea and vegetable fields, keeping field channels clear to prevent waterlogging. In Assam, maintain drainage furrows in pigeon pea and protect sugarcane from lodging; harvest mature jute and vegetables wherever conditions permit and postpone fertilizer, pesticide and other field operations during wet conditions.
- In the regions expecting heavy rainfall, including Tamil Nadu and Kerala withhold irrigation in standing crops, make necessary arrangements to remove excess rain water from the crop fields.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
