harvested produce in safe and dry places.

- In **Arunachal Pradesh**, maintain proper drainage in soybean, rice, maize, finger millet, chilli and other standing crops to prevent waterlogging. Harvest mature soybean and banana wherever field conditions permit and store the produce safely. Maintain good aeration in rice and remove decaying plant parts from soybean.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
